## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claim(s) 1-5, 7-24 and 26, drawn to a promoter comprising a nucleotide sequence corresponding to that shown as SEQ ID NO:1 or a variant, homologue, fragment or derivative thereof, a construct, a vector, a transformed host or host cell, and methods of using said promoter.

**Group II**, claim(s) 6, drawn to a promoter capable of causing endosperm specific expression obtainable from a plant of the genus *Oryza*.

**Group III**, claim(s) 25, drawn to use of a sequence presented as SEQ ID NO:2 or a variant, homologue, derivative or fragment thereof.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature linking Group III with Groups I-II is a polynucleotide. The technical feature linking Groups I-II is a promoter polynucleotide obtainable from a plant of the genus *Oryza*. A polynucleotide such as a promoter polynucleotide obtainable from a plant of the genus *Oryza* is anticipated, for example, by Burkhardt et al. (Plant

J. 1997 May;11(5):1071-8, see page 1072 column 2 second paragraph teaching the use of an endosperm-specific rice glutelin Gt1 promoter polynucleotide), and therefore does not constitute a special technical feature as defined by PCT Rule 13.2, because it does not define a contribution over the prior art. The special technical feature of each of Groups I-III is the distinct polynucleotide corresponding to each Group.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
